FLY NON-STOP DAILY TO NEW YORK CITY

Air travel demand in the US during the last week was relatively stable at around 85% of the level seen during the same period in 2019. Air Service One has identified and confirmed 15 new routes that launched in North America during the last week, of which four were between the US and Mexico, while LEVEL resumed service between Barcelona and Los Angeles, a

route it last flew in the summer of 2018. The US domestic routes saw Allegiant add eight new airport-pairs, of which four involved destinations in Florida. The shortest new route of the week was the 674-kilometre intra-Texas service started by Texas-headquartered Southwest, between Austin and Amarillo. Only four of the 15 new routes face direct competition.
